Question 1 | Correct Mark 1.00 out of 1.00

Convert the following algorithm into a program and find its time complexity using counter method.

```
Factor(num) {
{
   for (i = 1; i <= num;++i)
   {
    if (num % i== 0)
       {
         printf("%d ", i);
       }
    }
 }
```

Note: No need of counter increment for declarations and scanf() and counter variable printf() statement.

Input:

A positive Integer n

Output:

Print the value of the counter variable

Answer:

```c
#include<stdio.h>
int main(){
    int num,i;
    int counter=0;
    scanf("%d",&num);
    for(i=1;i<=num;i++){
        counter++;
        counter++;
        if(num%i==0){
            counter++;
        }
    }
    counter++;
    printf("%d\n",counter);

}
```
