**S2**

Started on	Sunday, 7 September 2025, 9:16 AM
State	Finished
Completed on	Sunday, 7 September 2025, 9:18 AM
Time taken	1 min 55 secs
Marks	1.00/1.00
Grade	10.00 out of 10.00 (100%)

**Question 1** | Correct Mark 1.00 out of 1.00

A person needs to eat burgers. Each burger contains a count of calorie. After eating the burger, the person needs to run a distance to burn out his calories.

If he has eaten  $i$  burgers with  $c$  calories each, then he has to run at least  $3^i * c$  kilometers to burn out the calories. For example, if he ate 3

burgers with the count of calorie in the order: [1, 3, 2], the kilometers he needs to run are  $(3^0 * 1) + (3^1 * 3) + (3^2 * 2) = 1 + 9 + 18 = 28$ .

But this is not the minimum, so need to try out other orders of consumption and choose the minimum value. Determine the minimum distance

he needs to run. Note: He can eat burger in any order and use an efficient sorting algorithm. Apply greedy approach to solve the problem.

**Input Format**

First Line contains the number of burgers

Second line contains calories of each burger which is  $n$  space-separate integers

**Output Format**

Print: Minimum number of kilometers needed to run to burn out the calories

**Sample Input**

```
3
5 10 7
```

**Sample Output**

```
76
```

**For example:**

Test	Input	Result
Test Case 1	3 1 3 2	18

**Answer:** (penalty regime: 0 %)

```

1  #include <stdio.h>
2  #include <stdlib.h>
3  #include <math.h>
4
5  // Comparison function for descending sort
6  int compare_desc(const void *a, const void *b) {
7      return (*(int *)b - *(int *)a);
8  }
9
10 int main() {
11     int n;
12     scanf("%d", &n);
13
14     int calories[n];
15     for (int i = 0; i < n; i++) {
16         scanf("%d", &calories[i]);
17     }
18
19
20     qsort(calories, n, sizeof(int), compare_desc);
21

```

```

22
23     long long total_distance = 0;
24     long long m =1;
25     for (int i = 0; i < n; i++) {
26         total_distance += m * calories[i];
27         m*=n;
28     }
29
30     printf("%lld\n", total_distance);
31
32     return 0;
33 }
34

```

	Test	Input	Expected	Got	
✓	Test Case 1	3 1 3 2	18	18	✓
✓	Test Case 2	4 7 4 9 6	389	389	✓
✓	Test Case 3	3 5 10 7	76	76	✓

Passed all tests! ✓

Correct

Marks for this submission: 1.00/1.00.
