**Question 1** | Correct Mark 1.00 out of 1.00**Problem Statement**

Given an array of 1s and 0s this has all 1s first followed by all 0s. Aim is to find the number of 0s. Write a program using Divide and Conquer to Count the number of zeroes in the given array.

**Input Format**

First Line Contains Integer m – Size of array

Next m lines Contains m numbers – Elements of an array

**Output Format**

First Line Contains Integer – Number of zeroes present in the given array.

**Answer:** (penalty regime: 0 %)

```

1 #include <stdio.h>
2
3 int findFirstZero(int arr[], int low, int high) {
4     while (low <= high) {
5         int mid = low + (high - low) / 2;
6         if ((mid == 0 || arr[mid - 1] == 1) && arr[mid] == 0)
7             return mid;
8         if (arr[mid] == 1)
9             low = mid + 1;
10        else
11            high = mid - 1;
12    }
13    return -1;
14 }
15
16 int countZeroes(int arr[], int m) {
17     int firstZeroIndex = findFirstZero(arr, 0, m - 1);
18     if (firstZeroIndex == -1)
19         return 0;
20     return m - firstZeroIndex;
21 }
22
23 int main() {
24     int m;
25     scanf("%d", &m);
26     int arr[m];
27     for (int i = 0; i < m; i++) {
28         scanf("%d", &arr[i]);
29     }
30     printf("%d\n", countZeroes(arr, m));
31     return 0;
32 }
